Koi Manzil Door Nahin

ecomet^{STAR} 1215HE

The new 12 ton ecomet range is engineered to carry heavy loads with ease, to lower maintenance cost and to give higher savings per trip

Class leading payload across variant

Heavy duty and reliable aggregates

Cable shift CSO for reduced gearshift efforts

Wide load body

Lube for life propeller shaft

Unilever clutch actuation system for lower effort and high reliability

HINDUJA GROUP

ASHOK LEYLAND i-Gen6 ADVANTAGE

Over the years, Ashok Leyland Ltd., strove to deliver performance beyond excellence with inline or 'SAADA' pump for BS-III and iEGR technology for BS-IV. Now with BS-VI, taking the proven iEGR technology up a notch, we are introducing the i-Gen6 engine technology which enhances the engine performance and durability further. With lower DEF consumption and compact design, i-Gen6 lowers the cost of operation per ton-km, offering better fluid efficiency and low maintenance. The unique Mid-NOx strategy ensures overall lower cost of ownership as compared to competition.

Innovative

Improved efficiency -

- Controls NOx generation in the engine itself

Lower TCO -

- Lower Diesel Exhaust Fluid (DEF) consumption
- Lower operational cost

Intelligent

Simple functioning -

- Lesser number of sensors

Improved EATS life -

- Lower maintenance cost

Indian

Mid-NOx technology

- iEGR + SCR
- Higher fluid efficiency

Highly robust -

- Best suited for Indian driving conditions

- Superior mileage: Proven iEGR engine with improved air intake & radiator offer higher performance
- Longer active regeneration intervals - ensures longer DPF life.
- Inline EATS: Allows flexibility in packaging / better space utilisation
- Larger (24L) Diesel Exhaust Fluid (DEF) tank : Coupled with lower consumption, ensures less frequent DEF refills
- First pipe length is 0.8 m: Best-in-class thermal management.
